Communication
Teamwork
Adaptability
Quick Learning
Time Management

EDUCATION

B.Tech CSE

Vignana Bharathi Institute of Technology

PROFESSIONAL SUMMARY

Generative AI Engineer and Full-Stack Developer (B.Tech CSE, 2026) skilled in Python, LangChain, Node.js, Express, React, Next.js, TypeScript and REST APIs. Delivered client projects end to end, from requirements and development to CMS/CRM integration, SEO and deployment. Experienced in building multi-agent systems with LLMs, MCP and n8n for intelligent automation, backed by an AI Engineering internship at Viswam.AI.

EXPERIENCE

AI Engineering Intern

Viswam.AI (Swecha Telangana)

May 2025 – June 2025

Hyderabad

- Built AI-driven workflows using Python for automation and data processing.
- Performed data validation, cleaning and preprocessing.
- Assisted in developing and improving AI automation pipelines.
- Collaborated with teams to design scalable AI-based solutions.
- Documented workflows and supported deployment preparation.

PROJECTS

Koshetty Jewellers

Jewellery Catalogue & Enquiry Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, Sanity CMS, HubSpot, next-intl, GA4, Vercel

- Built and deployed a mobile-first catalogue website for a jewellery store to showcase collections, product details and certifications.
- Designed a Sanity CMS schema so the client can add products, images and descriptions without code changes.
- Added English/Telugu support, WhatsApp product enquiries, enquiry forms with HubSpot CRM lead capture, Google Maps and GA4 event tracking.
- Implemented SEO (Open Graph, hreflang, structured data), optimized images and accessible responsive UI.
- Gathered requirements directly from the client and used AI-assisted workflows (Claude Code, MCP) to speed up delivery.

Live Project: koshetty-jewellers.vercel.app

Sunshine Overseas

Client Lead-Generation Web Platform

Tech Stack: Next.js 14, TypeScript, Tailwind CSS, Sanity CMS, HubSpot, Vercel

- Built and deployed a lead-generation website for an overseas education consultancy.
- Developed API routes to capture enquiry forms and integrated HubSpot CRM for lead management.
- Integrated Sanity CMS to enable dynamic content updates without code changes.

Key Coursework:
Data Structures
Database Management Systems
Software Engineering
Statistics

LANGUAGES

English	
Telugu	
Hindi	

- Implemented form validation, SEO optimization and reusable UI components for better performance and maintainability.

Live Project:
sunshine-overseas.vercel.app

Auto-EDA AI Automated Data Analysis Platform

- Tech Stack: Python, Pandas, Matplotlib, Streamlit
- Developed an AI-powered exploratory data analysis platform.
 - Automated dataset cleaning and preprocessing workflows.
 - Generated statistical summaries and visual insights.
 - Reduced manual analysis effort through automation.
 - Deployed a live web application using Streamlit.

Live Project:
auto-eda-ai-assisted.streamlit.app

AI-Powered WhatsApp Automation Bot Automation Project

- Tech Stack: n8n, REST APIs, AI Automation
- Built workflow automation systems using n8n.
 - Integrated APIs for automated messaging.
 - Designed intelligent response workflows.
 - Implemented real-time communication automation.

StuRequire Student Requirement Tracking System

- Tech Stack: Node.js, Express.js, SQL
- Developed a full-stack web application.
 - Implemented authentication and validation.
 - Built REST APIs for data management.
 - Designed structured database workflows.

ADDITIONAL HIGHLIGHTS

- Strong interest in Generative AI, AI Agents and Intelligent Automation.
- Experience working with LangChain, LLM integrations and workflow orchestration.
- Hands-on exposure to client-facing software development projects.
- Passionate about building production-ready AI systems.
